1	IGL/ET2/CP/CC17823	Cl no. 7.2, Technical Volume - II, Pg no. 33 of 130	<p>Calculation for Energy Consumption & Package Gas loss</p> <p>B. Energy Consumption: The compressor package shall be designed in such a way that Energy Consumption of electric motor (KWH) should be minimum for production of CNG. Bidder shall indicate actual Energy Consumption for their compressor package. This quoted figure will be used for evaluation and total quoted price for all compressors towards supply, special tools & tackles, erection and commissioning will be calculated as per following formulas: $F = G \times H \times I \times N$ Where, F = amount in Rs. G = Bidder's Energy Consumption rate quoted in Kg/hr for every 1200 SCM/H (876 Kg) of CNG produced H = Cost of Natural Gas per Kg @ Rs. 56/- per kg I = Avg. no. of running hours per year i.e. @ 5475 hours N = Number of machines Note-1: For Energy Consumption quoted by the bidder under guaranteed parameters, no benefit will be given below 137 KWH. Note-2: The amount (F) as per the above calculations for 10 years shall be considered on NPV basis with rate of interest @10% p.a.</p>	<p>To be read as:</p> <p>"B.
